

EE ProPack Stand-alone Licensing Guide

Introduction

A stand-alone license allows you to run EE ProPack on a single workstation. To obtain authorization for your license, you register your product.

Using EE ProPack's Authorization which is discussed herein, you request an authorization code from Engineered Efficiency, Inc. Engineered Efficiency, Inc. will process your request and if approved will send you an authorization code via the email address provided upon authorization request.

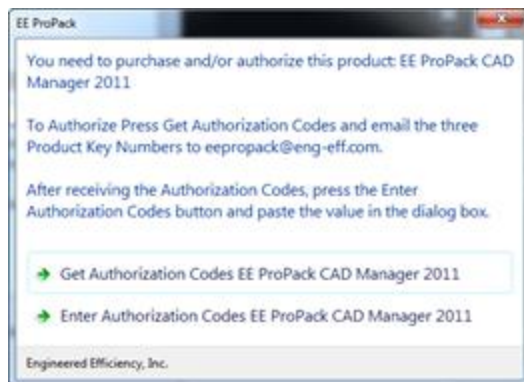

Upon receipt of the authorization code, you use EE ProPack's Authorization to manually enter the activation code. This authorization will launch every attempt to use an unauthorized version of EE ProPack.

Understanding Your Serial Number

You have to contact Engineered Efficiency before the authorization of the software can be completed.

To Begin the Authorization Process

The EE ProPack Authorization guides you through the process of both requesting an authorization from Engineered Efficiency and also enter the authorization received from Engineered Efficiency, which will thereby authorize the software.

Launching the EE ProPack Authorization

You can get to the EE ProPack Authorization two ways:

1. Any time a command is run and the product is not authorized.
2. At any time, you can choose the *Authorize EE ProPack* option in the EE ProPack Help Toolbox.

Get Authorization Codes EE ProPack CAD Manager 2011

Press the Get Authorization Codes EE ProPack CAD Manager 2011 button.

A page will then come up with three product keys. Send these product keys to eeopack@eng-eff.com

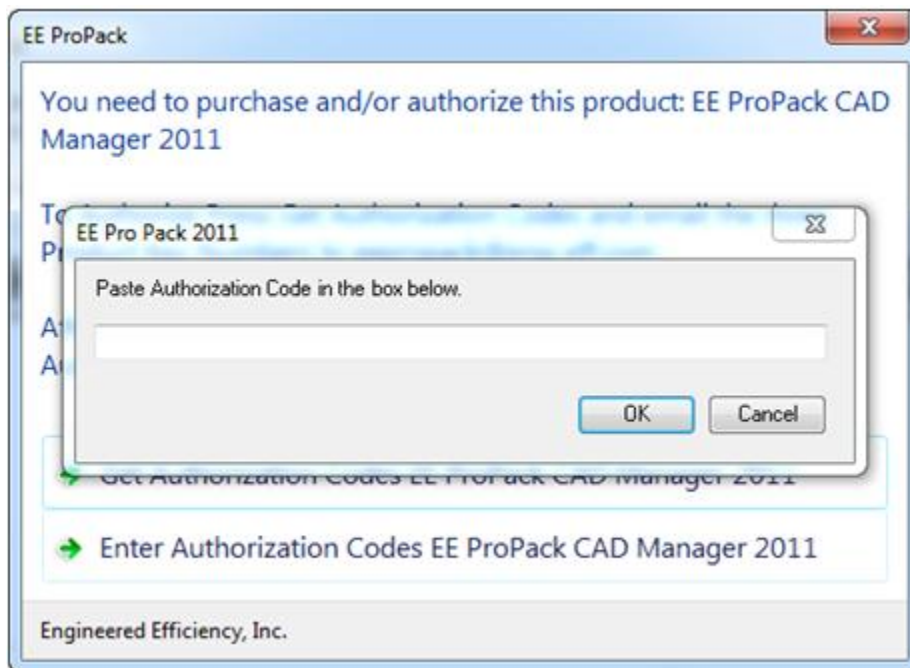

To request an authorization code, Engineered Efficiency requires that you provide your first and last name, your company name, your product keys (this is automatically provided to you by EE ProPack), and the email address to send the authorization code to.

Once you have provided the information required information Engineered Efficiency will send you the authorization code to the email address provided in the authorization code request.

Authorizing an EE ProPack Stand-Alone License

Once you have received your authorization code, you launch the EE ProPack Authorization or run a command. Press the Enter Authorization Codes EE ProPack CAD Manager 2011 button.

Copy the authorization code from the email received from Engineered Efficiency and paste it in the dialog box that appears.

Upon entering the code into the code window, click "OK". If authorization was successful, the dialog box will close and you can begin using EE ProPack!!
